Type with ISO 35 tapers quick-change attachment for mills

Maximum milling capacity Ø 20 mm

High precision, reliability and rigidity chuck, with integral elastic collet on rollers

High tightening torque

Tool presetting

The elastic collet structure allows for a stiff and secure hold of the tool

Increased cross-section collet for strong locking and to prevent dangerous vibrations

Complete with:

1 quick-release attachment with fall-prevention system, ISO 40 taper - Thread M 16x2

2 bushes for Morse taper tool attachment CM1 - CM2

1 chuck for face mills with mill holder Ø 32 mm

Supplied in wooden box with accessory collets and wrenches as indicated in the table

Dimensions LxPxh 420x300x110 mm

Consisting of:

						
1 chuck ISO taper 35	1 quick-release attachment ISO taper 40	2 bushes for Morse taper tool MT2 and MT3	1 chuck for face mills Ø 32 mm	5 cylindrical collet Ø 6-16 mm	3 C-hook wrenches for slotted nuts Ø mm 58-62 (2 pcs.) - 80-90	1 hexagon key L-wrench 14 mm

Type with chuck with quick-release attachment and MT 2

For tapping M 4÷14 - W 3/16÷1/2 - G 1/8÷1/4

High quality and precision chuck with automatic adjustment of the tapping torque

Also suitable for drilling up to max Ø 23 mm

Used with the help of the bushes contained in the assortment

Complete with:

5 bushes for taps M4 - M5 - M6 - M8 - M10 with attachment DIN 371

2 bushes for taps bits M12 - M14 with coupling DIN 376

1 chuck-holding bush with attachment B16

Supplied in metal box, dimensions LxPxh 300x220x135 mm

Consisting of:

				
1 chuck CM2	5 bushes for taps DIN 371 Ø 4 - 5 - 6 - 8 - 10 mm	2 bushes for taps DIN 376 Ø 12 - 14 mm	1 chuck-holding bush attachment B16	1 hexagon key L-wrench 14 mm
