

Sprays with "360° valve" have a:

- 1) special valve for content distribution in all positions
 - 2) distributing straw suitable for accurate product dosage and to spray in hard-to-reach places
- All sprays DO NOT contain ozone depleting gases - Content 400 ml

Sold in indivisible packages 

With 360° valve to provide the product in all positions, guaranteeing the possibility of completely emptying the product
Distributing straw suitable for an accurate product dosage and to spray in hard-to-reach places

«DISINCROSTOIL» - PENETRATING, DESCALING, PROTECTIVE RELEASER

- high penetrating power
- ideal for quickly loosening screws, nuts, metal parts, hinges and very rusty locks
- it dissolves rust eliminating friction squeaks, protects from and avoids the formation of new corrossions

Code K 3826 3000	K 3826/3	Each €	 6
------------------	-----------------	--------	--

«ELECTRONICOIL» - DEOXIDIZING PROTECTIVE DETERGENT

- ideal for electronic and electrical equipment, such as relays, switches and remote switches, speakers, transmitters, transistors, watches, electric controls, control panels, chronometers, measuring instruments, reels, spark plugs etc.
- waterproof, it protects against and removes oxidation, condensation, dust and dirt

Code K 3829 2000	K 3829/2	Each €	 6
------------------	-----------------	--------	--

«SEPRENE 1» - DETACHING LUBRICANT WITH SILICONE

- pure **silicone** agent for moulding work on plastic, rubber and synthetic resin
- does not corrode most of the metals
- an excellent lubricant between steel and non-ferrous metals and is suitable for avoiding adhesions and ageing

Code K 3830 1000	K 3830/1	Each €	 6
------------------	-----------------	--------	--

«SEPRENE 2» - DETACHING LUBRICANT WITHOUT SILICONE

- **silicon-free**, suitable for metal casting and moulds made for plastic and rubber
- avoids the risk of cracks
- thanks to this lubricant, the moulded pieces have surfaces suitable and ready for chrome plating, painting, metallization, silk-screening and glueing, avoiding preventive treatments

Code K 3830 2000	K 3830/2	Each €	 6
------------------	-----------------	--------	--

«PULIFREN» BRAKE AND CLUTCH CLEANER

- ideal for excellent cleaning of disc brakes, drum brakes, and clutches
- for use in mechanical workshops and various kinds of industrial applications
- high dissolving and degreasing power, and high evaporation, it dries quickly and leaves no residue

Code K 3830 4000	K 3830/4	Each €	 6
------------------	-----------------	--------	--

«CATEN OIL» - LUBRIFICANTE PER CATENE AL BISOLFURO DI MOLIBDENO

- lubrificante, degrippante, sbloccante, idrorepellente e antiossidante
- con sbloccante attivo al bisolfuro di molibdeno MoS2
- scioglie la ruggine e favorisce lo sbloccaggio di viti e bulloni, riduce la coesione tra superfici e depositi di ruggine, previene le ossidazioni
- adatto per officine meccaniche, industrie, settore automotive, ferramenta, impianti di aria condizionata e idraulica

Code K 3831 0000	K 3831	Each €	 6
------------------	---------------	--------	--

«CATENOIL PLUS» - GREASE FOR LUBRICATING MECHANICAL PARTS

- with lithium and molybdenum disulfide, it is suitable for lubricating mechanism under high temperatures, protecting and lubricating up to +250°C
- it protects toothed crowns and jointed elements of excavators, tractors and agricultural machineries, transmission chains, toothed wheels, metallic ropes
- it reduces friction and wear of materials, creating a solid lubricating film that does not evaporate
- resists high temperatures, oxidation and water

Code K 3831 2000	K 3831/2	Each €	 6
------------------	-----------------	--------	--

«VASELINE OIL»

- very fine protective lubricant for the food industry in general
- ideal for use on small appliances, sewing machines, and weaving looms
- suitable in the hardware and automotive industries, and in various industrial applications

Code K 3831 4000	K 3831/4	Each €	 6
------------------	-----------------	--------	--
