

Sprays with "360° valve" have a:

- 1) special valve for content distribution in all positions
 - 2) distributing straw suitable for accurate product dosage and to spray in hard-to-reach places
- All sprays DO NOT contain ozone depleting gases - Content 400 ml

Sold in indivisible packages 

«MARINOIL» - UNLOCKING PROTECTIVE LUBRICANT

- lubricates, protects from corrosion and prevents any electrical and mechanical problems caused by humidity and salt water
- suitable for marine applications, nautical equipment, marine engines, homes etc.
- dissolves rust and fouling, quickly releasing the locked parts, deep-penetrating and protecting
- water-repellent, does not contain acids and doesn't damage metal, paint, etc.

Code K 3832 0000	K 3832	Each €	 6
------------------	---------------	--------	---

With 360° valve to provide the product in all positions, guaranteeing the possibility of completely emptying the product
Distributing straw suitable for an accurate product dosage and to spray in hard-to-reach places

«LUBRIFRESH» - UNIVERSAL CUTTING OIL

- ideal lubricant for mechanical work and removing burrs
- excellent surface adhesion, even on irregular, convex parts; flows with the right fluidity even on parts in hard-to-reach places where it is not possible to insert a brush or other tool
- especially effective on stainless steels and hard and soft metals

400 ml

«CINGHIAFERM» - NON-SLIP PROTECTIVE FOR BELTS

- for flat belts made of rubber, leather, cotton or other fibres
- also suitable for trapezoidal vehicle belts and for all types of transmission belts
- protects against cuts and chaps, resists the accumulation of dirt, therefore keeping treated surfaces clean

Code K 3834 0000	K 3834	Each €	 6
------------------	---------------	--------	---

«GRAFITENE» - DRY GRAPHITE LUBRICANT

- has an uniform, balanced surface expansion
- indispensable for special applications where, due to high temperature (up to 140°C), it is advisable to avoid the use of hydrocarbons suitable for bearings, shafts, sliding guides, gears, springs, and leaves, conveyors, pressure moulding machines
- also used on moving pieces or in mounting and assembly phase

Code K 3835 0000	K 3835	Each €	 6
------------------	---------------	--------	---

«GRASSOSPRAY» - UNIVERSAL ADHESIVE LUBRICATING GREASE

- multi-use, water repellent, adhesive grease
- ideal for lubricating bearings, metal cables and transmission chains
- long-time protection against wear, corrosion and humidity

Code K 3836 0000	K 3836	Each €	 6
------------------	---------------	--------	---

«PERMANENT PTFE» - UNIVERSAL DRY ADHESIVE LUBRICATING

- with PTFE, long-lasting
- multi-use, water-repellent, adhesive, with exceptional lubricating properties for temperatures from -15°C to +250°C
- ideal for lubricating bearings, metal cables and transmission chains
- long-time protection against wear, corrosion and humidity

Code K 3836 2000	K 3836/2	Each €	 6
------------------	-----------------	--------	---

«COMPRESSED AIR» - DRY AND CLEAN AIR, COLORLESS, ODORLESS

- the dry and clean air jet allows for the removal of particles deposited in hard-to-reach places of delicate machineries, the removal of particles and contaminating agents from any kind of electronic equipment, such as computers, control devices, etc.
- with straw for better directing the air flow
- use in vertical position and spray for very short time to avoid the freezing effect

Code K 3838 0000	K 3838	Each €	 6
------------------	---------------	--------	---
