«RILEVAGAS» - GAS LEAK DETECTOR

- especially suited for checking leaks in gas systems
- for all types of gas (city gas, methane, carbon dioxide, nitrogen, ethylene oxide, argon, freon, chlorine, hydrogen and also compressed air and oxygen)

Code K 3846 0000	K 3846	Each €		6
------------------	---------------	--------	---	---

CRACK DETECTOR

Kit for easy and precise detection of any defects that may have developed during welding or pressing operations on metal elements

Does not ruin the examined surfaces

Use:

- 1 - Use **CRACK CLEANER K 3846/5** to clean and degrease the surface to be examined
- 2 - **Spray a** light layer of **red CRACK PENETRANT K 3846/6** and wait 15/20 minutes for the liquid to react
- 3 - Always remove excess red penetrant K 3846/6 with cleaner K 3846/5 and let the surface dry
- 4 - Use **white CRACK DEVELOPER K 3846/7** and let it act for a few minutes.

After these steps, any defects in the metal will be highlighted by red traces.

Code K 3846 5000	K 3846/5	Each €		6
Code K 3846 6000	K 3846/6	Each €		6
Code K 3846 7000	K 3846/7	Each €		6

Con valvola a 360° per erogare il prodotto in tutte le posizioni garantendo lo svuotamento completo del prodotto
Erogatore a cannucchia per un dosaggio più preciso e posti difficili da raggiungere
