

Screwdrivers with interchangeable blades

System made of interchangeable blades, to be used with a working hand grip or cap

All elements have a high insulation protective coating

Two-component, ergonomic hand grip for comfortable, safe gripping, suitable for applying high tightening torque

As an alternative to the hand grip, the blades can be used with the resin cap that, along with the soft rubber ring they are fitted with, make it possible to do precision work (e.g. micro electronics)

ABC tools

Series of interchangeable blades with high-insulation protective coating and grips

With 8 blades

Consisting of:

1 manoeuvre handle with automatic lock

1 reduced diameter handle with rotating head
